

Infinite possibilities

KALEIDO HS5200

UV ROLL PRINTER

Outstanding Features

Solid Structure :-

Heavy duty design with 4 grand drum rollers for feeding materials, which ensures handling soft film materials as thin as 0.18mm without any wrinkle or deformation on the prints.

Precise Platform :-

Adopt water cooling platform for consistent temperature condition on the materials to prevent stretch and wrinkle, as well as avoids deformation on heat sensitive media.

UV Curing System :-

Install intelligent LED Curing system with power levels to avoid deformation on heat-sensitive materials and much power saved every year.

Excellent P.H. :-

Powered by high speed grey-scale KM1024A printheads as configuration of 2(CMYKLcLm), 3(CMYK)+2W and 4(CMYK) for mass production capability, and Varnish is optional for special application.
